MESSAGE FROM THE LIBRARY DIRECTOR

Out goes the old year of the ox, and in comes the year of the tiger with the warmth of spring breeze. 2021 marked the centenary of the Communist Party of China, and the starting year of the 14th Five-Year Plan. With facilitating the university's "double world-class" development as its mission, the Library has made continued progress in COVID-19 prevention and the **S³—Standard, Smart and Special** information and knowledge services, developing vigorously with concerted efforts and firmly moving forward to write a new chapter with excellent services.

In 2021, sustaining the revolutionary legacy and carrying forward the great founding spirit of the Party were the themes of the times. The Shanghai Teaching Staff Competition on Xi Jinping's Quotes of Classics, hosted by the Library, received high praise and won the "Special Contribution Award". Competitions and exhibitions including the school-wide Party History Knowledge Contest, Party Newspaper Exhibition on July 1st, and the library history exhibition were also held to revisit the history and original intentions of the Party, the country, and the library.

During the 125th anniversary of the university, the renovated Pao Yue-Kong Library was reopened, providing fresh experiences to readers with its multi-functional and intelligent learning space. The well-designed Tsung-Dao Lee's Study and Sky Garden in Main Library have also become the must-visit locations of the university. The Arts & Humanities Study Rooms at Xuhui Campus and the study room on the second floor of the Tsung-Dao Lee Library have taken on a beautiful new look after renovation.

In 2021, the university fully supported the development of disciplines, while ensuring the quantity and quality of both

*"Fulfilling the Library's responsibilities and missions,
and striving for service innovation and development."*

library inventory and collection. Comprehensive inventory of first-, second-, and third-tier collections was completed with high efficiency and accuracy, laying the foundation for refined management of collections. A new type of subject knowledge information navigation service centered on the Academic Resource Map was officially launched, which aggregates related high-quality resources with marked effectiveness. Benchmarking undergraduate teaching reference books of world-famous universities, the Library continued to strengthen support for teaching resources and undergraduate education. Seamless connection between electronic reference service system and university education system, named as Canvas learning management system, was achieved.

In 2021, in keeping with the university strategic plans, significant progress was made in advance research in science and technology as well as institutional repository building. Research on Nobel Prize winners and their achievements has been highly recognized by the university. The Institutional Repository of Shanghai Jiao Tong University (IR) made its highly-anticipated debut, garnering praise for the one-stop retrieval of the academic achievements of more than 10,000 scholars of the university in rich illustration. Cutting edge analyses on energy & mining, deep space exploration, ocean renewable energy and other interdisciplinary innovation fields were conducted to inform decision-making concerning the university's scientific research.

In 2021, the library extended its opening hours and remained open all year round. The efficiency of the Tsung-Dao Lee Library was fully upgraded, and the science and art fund campaigns went global.

What is past also marks a new beginning. In 2022, the Library will adhere to its main responsibilities and missions, namely, putting readers first and better serving the needs of the country and the development of the university. By centering around the **3E** road map of building **Excellent** library collection mechanisms, **Efficient** information acquisition systems, and **Exact** knowledge supply capabilities, we will give full play to the role of university library in talent development, scientific research, social services and cultural inheritance, so as to empower high-quality development of university education cause, and contribute to the university's transformation into a "comprehensive, innovative and international" world-class university with Chinese characteristics.
